NOTES

1. This table shows how many responders chose each issue as a Priority 1,2, or 3. The raw rank reflects the total votes per issue.
2. Vote Weighting: A Priority 1 Issue is deemed to have been considered more important to the responder than a Priority 2 issue, which in turn is deemed to have been more important than a Priority 3 issue. To reflect the relative importance of Responders' Priorities, their votes have been weighted as follows: Priority 1 votes have been assigned 3 points each, Priority 2 items 2 points each, and priority 3 issues 1 point each.
3. The original survey request listed Issues 1 to 11 only. Issues 12 to 16 were added by survey responders.
3. From the October 2013 Survey, 500 survey requests generated 206 responses, for a 41% return rate.
